UNIVERSITY

Center for the
Advancement of
Diagnostics for a
Just Society

Accelerate the Future of Diagnostics

The ADJUST Mission: Accelerate the development, translation, and implementation of new technologies that enable the democratization of disease diagnosis, screening, and surveillance; and address the societal challenges thereof.

Banked, prospective and
remnant clinical samples

Benchtop evaluation
& technology de-risking

CLIA-certified
reference laboratories

Human factors
and usability insights

Independent verification
of performance

Clinical studies and more

Access to diverse clinical settings across metro Atlanta

01 Children's Healthcare
of Atlanta

02 Emory Healthcare

03 Grady Health System

Just Society

ADJUST Center Expertise and Resources:

Expertise and consulting:

- Key opinion leaders
- Clinical experts
- Basic science
- Engineering
- Regulatory
- And more

Biospecimen resources:

- Remnant clinical sample collection
- Primary specimen biobanks
- MDR bacterial isolates

Diagnostic technology evaluation:

- Benchtop evaluations
- De-risking of technologies
- Analytical studies
- Usability & human factors insights of performance
- CLIA-waived user studies
- Clinical study sites for FDA submission

Shape the Future of Flu Diagnostics
Your input matters!

Take a survey to help our **FluDx Accelerator** better understand what influenza test developers need to innovate faster.
